

# PRIMEO – innovative diagnostic and treatment forms

Thanks to our numerous partnerships with companies and partner institutions, we facilitate broad and paid access to innovative medical diagnostic and treatment forms. In this area, we pay 90% of the invoiced costs, up to CHF 5,000 per calendar year.

Please call us at 0844 80 81 82 before going for treatment or an examination. We will advise you and put you in contact with the right people. Insured who chose an alternative insurance model for their basic insurance should first contact their family doctor or the medical advice helpline.

Further details and in-depth descriptions of the covered medical innovations and benefits can be found at [helsana.ch/en/innovations](https://helsana.ch/en/innovations)

Status as at 1 December 2024. This list may change during the course of the year. Changes are expressly reserved.

## Genetic analyses and advice

Helsana pays for a large number of medical genetic tests from various fields of application and provides you with a range of advisory services relating to genetic analyses:

### 1. Examinations for prevention, early detection and risk assessment

Cardiovascular illnesses, excess weight, food intolerances and autoimmune diseases are influenced by genetic factors or nutrition. Genetic testing gives you valuable insights and tips on prevention and risk assessment for diseases.

An overview of the currently covered genetic tests can be found at [helsana.ch/en/prevention](https://helsana.ch/en/prevention)

### 2. Tests for therapies and medications

Medications can trigger undesired side effects. Interactions can also be experienced when taking several medications. Genetic tests help to minimise these and can also help in choosing the right form of therapy.

An overview of the currently covered genetic tests can be found at [helsana.ch/the-right-medication](https://helsana.ch/the-right-medication)

### 3. Advisory service for genetic tests

Genetic factors play a key role in some diseases. The enormous progress that has been made in medical genetics research is a key reason why today's healthcare has improved.

With PRIMEO, you benefit from direct access to leading experts in the field of medical genetics in Switzerland: [helsana.ch/genetic-counselling](https://helsana.ch/genetic-counselling)

## Innovative examinations, self-tests and medical products

In addition to innovative medical examinations that are performed under medical supervision, Helsana also pays for select self-assessment tests and medical devices.

Should you be interested in one of the listed innovative examinations, self-tests or medical devices, please contact us by calling 0844 80 81 82 and enquire about possible payment.

We will be happy to check your enquiry and guarantee assumption of the costs in the event of a positive outcome.

## 1. Innovative examinations

Technological advances and the opportunities provided by digitalisation can significantly improve medical care thanks to the development of ever-better and more precise examination methods.

## 2. Self-tests

Thank to simple self-use at home, quick tests issued by pharmacies can provide quick and reliable results and thus clarity for those affected.

## 3. Medical devices

Medical devices are medical technology devices and medical aids and serve to identify and treat illnesses.

Further information on the covered innovative examinations, self-tests and medical devices can be found at [helsana.ch/further-examination](https://helsana.ch/further-examination)
