Independent and transparent.

BetterDoc

SAMPLE

Your personal result

Below we present three spinal surgeons at hospitals who are qualified to provide consultation, treatment, and surgery for your situation.

The selection is based on your information and has been individually researched for your situation. BetterDoc acts independently and deliberately avoids contractual ties with doctors.

Contact Us

If you have questions about your results, need to schedule an appointment with one of the doctors or a hospital, or require further specialist search, we are here to assist and support you.

Please note that the information listed by BetterDoc does not represent a diagnosis or a therapy recommendation and in no way replaces a visit to the doctor.

Some medical terms are numbered and explained in the glossary on the last page.

Your cooperation is important!

Help others find the best medical care as well. Simply share your experiences with us. Your feedback helps us continuously improve our quality. We will send you a questionnaire via email – and thank you in advance for your valuable feedback.

Dr. med. Donata von Dellingshausen
Founder and Medical Director of BetterDoc

Billing Information

There are no tariff surcharges for you in case of outpatient treatment outside the canton, as long as you follow the rules of your alternative insurance model. Before any hospital stays (including inpatient surgeries), please always clarify the cost coverage directly with your primary and supplementary insurance, as well as any other involved insurances, to avoid incurring additional costs. If a hospital stay or surgical intervention becomes necessary only after an outpatient consultation or treatment, please contact BetterDoc again in advance so that we can assist you in choosing a suitable specialist.

Information about the clinic / department / practice

Clinic case numbers

Fourth highest case number in Switzerland

Surgery on the spine and spinal cord: 1021 inpatient cases

Second highest case number in Switzerland

Excision of intervertebral disc tissue: 227 inpatient cases

Source: Fictitious case numbers for illustrative purposes

Acquired Certificates

- **Surgical Spine Centre of Excellence (EuroSpine)**

The certificate designates the clinic as a specialized facility in spinal surgery and confirms interdisciplinary collaboration with various departments, including neurology, pain management, vascular surgery, and physical therapy. The clinic is equipped with specific diagnostic measures, an intensive care unit, and postoperative monitoring. At least one doctor in the clinic holds the EuroSpine Diploma, and a spine specialist is always available. Emergency surgery can be performed at any time. The clinic has treated at least 300 cases surgically and facilitates postoperative follow-up care. The certified clinic also meets special quality requirements. These include the analysis and review of complications, participation in scientific projects, and infection monitoring. A quality management system must be in place to assess risk, complaints, and error management.

Further information

- You can schedule an appointment in the hospital by telephone. The appointment will be conducted by one of the doctors from the team of Prof. Dr. med. John Doe.

Information about the doctor

PD Dr. med. Sarah Miller is a specialist in **orthopedic surgery and traumatology of the musculoskeletal system**

She works as a **Chief Physician**

Postgraduate training

- Emergency Medicine
- Spine Surgery

Personal certificates

- Master Certificate DWG (German Spine Society [Deutsche Wirbelsäulengesellschaft])
Obtaining the certificate requires the successful completion of the basic certificate, a minimum of 215 spinal surgeries, and at least one year of work in a spinal surgery center.
- Basic Diploma (EuroSpine)
To obtain the certificate, six modules on the treatment of spinal disorders must be completed. The modules cover degenerative diseases, spinal deformities, injuries, tumors, and inflammatory conditions.

Clinic case numbers

Highest case number in Switzerland

Surgery on the spine and spinal cord: 1137 inpatient cases

Fifth highest case number in Switzerland

Excision of intervertebral disc tissue: 279 inpatient cases

Source: Fictitious case numbers for illustrative purposes

Acquired Certificates

- Spine Center (AOSpine)

The AOSpine certificate confirms that the clinic performs at least 300 spinal surgeries annually, on at least three days each week. The clinic covers the treatment of degenerative diseases, tumors, inflammatory conditions, injuries, and deformities. The chief physician of the clinic must hold the Master Certificate of the German Spine Society (Deutsche Wirbelsäulengesellschaft, DWG). Additionally, the clinic must have at least three specialized spine surgeons. The clinic also includes an outpatient department for preoperative assessment and postoperative follow-up care. Furthermore, the clinic is actively involved in scientific research.
